

## Place Value

Year 1 LO – to begin to use jottings

Yesterday you partitioned numbers into tens and ones. Today I would like you to jottings to show the number. Jottings represent the dienes so a stick of 10 dienes is drawn as a line and a dienes cube for one is a dot.

$$25 = \text{||} \dots \dots$$

34	17	46	25
62	28	15	73

Year 2 To subtract (not bridging 10.)

Choose a number from the circle and subtract a number from the triangle. Write the number sentence and solve it using jottings. Remember to subtract the tens and then the ones. You will not be bridging 10 so do not need to swap.
