

**LO – To predict and then test which materials are absorbent. Year 2**

1	Watch the first page of the Power Point. What does absorbent mean?
2	Predict if you think these materials are absorbent. Write yes or no in the first empty column and in the next column explain why you think this. Remember – if you don't have any of the materials, use something else.
3	Test to see if the materials are absorbed by putting them in water. Did they absorb water? Write yes or no in the last column. Were you correct?
4	Watch the rest of the Power Point to find out more.

Material	Predict. Is it absorbent?	Why do you think this?	Test. Is it absorbent?
